SUMMARY

Organized, detail-oriented Computer Science graduate with project coordination experience across healthcare and insurance software, client engagements, and a $2.6M funding portfolio. Gathers requirements from non-technical clients and translates them into scoped tasks, timelines, and clear documentation. Tracks budgets and expenses, prepares status reports for clients and internal stakeholders, and keeps project files organized. Manages multiple priorities in fast-paced environments, eager to learn end-to-end project management alongside an experienced Project Manager.

EDUCATION

Iowa State University **Ames, Iowa**
Bachelor of Science in Computer Science, Minor in Psychology *Graduated: May 2026*

EXPERIENCE

Pippa LLC **Chicago, IL**
Product Management Intern *May 2026 – August 2026*

- Delivered a two-sided healthcare platform to 200+ outpatient clinics and 10K+ daily users, owning scope, task breakdown, and release timelines from first requirement through launch
- Ran discovery calls with 229+ clinicians, translating client requirements into a prioritized backlog of features and workflow changes, and documenting every interaction, decision, and milestone
- Maintained product and process documentation covering consent flows, care plans, clinical notes, and reporting, keeping project files organized so clinic staff could onboard without engineering support

W.R. Berkley Corporation **Urbandale, Iowa**
Software Engineer Intern *May 2025 – August 2025*

- Delivered features for the underwriting applications used daily by internal insurance teams, gathering requirements directly from staff and turning them into scoped, tracked work across policy, claims, and billing workflows
- Saved 4,500+ hours annually (84+ hours weekly) by mapping and automating the manual data entry teams performed between systems, a workflow optimization found by shadowing the people doing the work
- Coordinated with QA and DevOps on release pipelines, routing work through review and approval steps and aligning schedules and handoffs across three teams

Iowa State Dept. of Computer Science – SwAPP Lab **Ames, Iowa**
Research Intern *May 2024 – August 2024*

- Managed a summer research project end to end under a fixed timeline: scoping, execution, evaluation, and reporting
- Documented methods and presented regular status updates, turning dense technical detail into clear next steps a non-specialist audience could act on

LEADERSHIP & STAKEHOLDER EXPERIENCE

Iowa State Student Government **Ames, Iowa**
LAS Senator, Legislative Branch *January 2024 – January 2025*

- Reviewed and allocated $2.6M+ in annual student funding, evaluating budget requests against available funds and documenting allocation decisions for campus stakeholders
- Led campus infrastructure initiatives from proposal to approval, coordinating with facilities staff, administrators, and student organizations to move each request through the required review steps

CLIENT & TEAM PROJECT DELIVERY

- **Neighborhood Finance Corporation** (nfc.how): Led a 4-person team delivering a mapping system for a nonprofit client, saving them $100,000+ annually; gathered requirements from non-technical staff and wrote the documentation they use to maintain it
- **HerdRight** (herdright.com): Led a team of 5 building a livestock marketplace connecting 30K+ buyers and sellers, coordinating work across payments, listings, and pricing
- **VerifyAI**: Led a 4-person team to 1st place in the Technical Track out of 28 teams, scoping and shipping a working product under a fixed deadline

SKILLS

- **Project & Client:** Requirements gathering, task tracking, timeline management, budget & expense tracking, status reporting, project documentation & file management, client communication, stakeholder alignment, cross-functional coordination, multitasking, workflow optimization
- **Tools & Technical:** Microsoft Office (Word, Excel, PowerPoint, Outlook), Adobe Acrobat, Google Workspace, Figma, SQL, Git, Python, TypeScript, React, AWS
